

Administrator checklist

A concise guide to the current Electrical Open administration tools

Access levels: only users with an administrator role can see the Admin tools. Use the least access needed for the person helping the society.

Administrator tools

- **Membership & Handicaps:** manage season members, club handicaps, handicap adjustments and member invitations.
- **Fixture Calendar:** create or amend fixture course, competition name, date and tee time.
- **Fixture Participants:** start each fixture with an empty list; add members or guests; remove entries made in error.
- **Course Details:** add tee, course rating, slope, course par, hole pars and stroke indexes.
- **Scores & Results:** review or correct scorecards, record NR scores, finalise conditions and publish results.

The Admin page is divided into clear sections so roles can be shared safely.

Before publishing results

- Check that each entrant has a complete scorecard or an NR recorded.
- Enter the Playing Conditions Calculation (PCC), which must be between -1 and +3.
- Confirm the countback order and Order of Merit points.
- Publish results only after these checks. Commit a completed fixture when all work is finished.

ELECTRICAL OPEN GOLF SOCIETY

Adding an administrator

Use the Supabase dashboard carefully

How to give access

- Make sure the person has first been invited to the app and has signed in.
- In Supabase, find their user ID in **Authentication - Users**.
- Open the SQL Editor and add the appropriate permitted role in **public.user_roles**.
- Refresh the app. The Admin link appears next to the user initials when their role is recognised.

Recommended: give membership/fixture helpers the smallest role that meets their needs. Keep full administrator access for the people responsible for configuration, results and member invitations.

Removing access

- Remove the relevant row from **public.user_roles**; do not delete a player record just to remove administration access.
- Sign out and back in to confirm that the Admin link has disappeared.
- Keep a record of who has full administrator access.

Support

The full member guide is available from Help in the app. Use it when supporting users with phone installation, login, notifications or paired scorecard entry.
