

Membership Administrator Guide

Simple instructions for maintaining the yearly member list and fixture participants. Written for everyday use - no technical knowledge needed.

What this role does

Membership administrators keep the society's player lists accurate. You can add and remove members for a season, create or amend fixtures, and choose who plays in each fixture. You do not need to manage the database, course scorecards, scores, or results.

IMPORTANT: Adding a person as a season member does not create an app login for them. A linked app account is shown by a small phone symbol next to their name.

Before you start

- Open Electrical Open and sign in with your own account.
- Use the Admin button beside your initials, then choose the tab you need.
- The page saves changes immediately after you press Add, Remove or Save. Wait for the confirmation message before moving on.
- Names are shown as SURNAME, Name so that lists stay in alphabetical order.

1. Set up the season member list

Go to Admin > Membership & Handicaps. Select the correct Season year at the top.

- 1 Check the top list first. It shows everyone selected for that season.
- 2 To correct a mistake, press Remove beside that person's name. This removes them from that season only; it does not delete their history.
- 3 Use Players available to add for people already in the database. Press Add. The name moves into the selected list.
- 4 For someone completely new, use New member. Enter their surname and first name, then press Add to player database. Add them to the season list afterwards.

Useful checks

- Use the correct year before making changes. A member can be in one year but not another.
- Do not add a guest as a season member unless they have actually joined the society.
- The phone symbol means the name is linked to an app account. No symbol means they are not linked, or have not yet been invited.

2. Create or change a fixture

Go to Admin > Fixture Calendar.

- 1 Create a fixture with the course name, competition name, date and tee time. It starts with an empty participant list.

- 2 To change a fixture, choose it in Modify fixture. The current information is loaded into the form. Make the change and press Save fixture changes.
- 3 Only delete a fixture if it was created in error. Read the confirmation carefully: deletion removes the fixture and its attached data.

A new fixture is not complete until the course details, participants and scores are dealt with by the appropriate administrator.

3. Add people to a fixture

Go to Admin > Fixture Participants, then choose the fixture from the list.

- 1 Selected participants is the people already playing. Use Remove to take someone off the fixture. This does not remove them from the season list.
- 2 Use the season members list to add regular members. Use the non-members list for a returning player who is not a member for that year.
- 3 For a guest not already listed, use Add new guest. Type the name in Name, SURNAME format to find an existing person, or enter the first name, surname and handicap index manually.
- 4 Check the selected participants list before leaving the page. It is the list used for the fixture start sheet and scorecards.

Guest names and handicaps

The app keeps guests for future reference. If the same guest returns, look for them in the non-member or name suggestion list instead of creating a duplicate. Check their handicap index is current before adding them to a fixture.

4. If something looks wrong

- If an Add button appears to do nothing, wait a few seconds, refresh the page, and check the top selected list. Do not repeatedly press Add.
- If a player is in the wrong year, remove them from that year's selected list. Their old scores and past membership are retained.
- If the fixture you need is not in the list, check that it has not already been completed or deleted. Completed fixtures are deliberately hidden from working admin lists.
- If you are unsure whether a change will affect a previous result, stop and ask an App Administrator. Do not edit a completed fixture.

Your handover note

At the end of a season, tell the next Membership Administrator which season year is current, who has access, and where this guide is in Help. The App Administrator controls account invitations and higher-level access.
